EXPERIENCE

LEMONWAY (FINTECH) - PARIS

JANUARY 2021 - ONGOING

STACK : VUE.JS / NESTJS / TYPESCRIPT

- Migrated a user dashboard from Vue 2 to Vue 3 in order to meet PCI/DSS requirements
- Managed to refactor a dashboard while keeping the delivery going, platform performances increased by 60%, users satisfaction by 40%
- Partnered with data-scientist & designer to track user's path and auto KYC completion rate
- Gathered microservices into a monorepo (turborepo) from scratch
- Participated in each step of the design system process from ideation to development making components library available for everyone at LW
- Organised several workshops to homogenize internal coding conventions

ONEPOINT (ESN) - PARIS

OCTOBER 2018 - JANUARY 2021

STACK : REACT / NODE.JS / TYPESCRIPT

- Partnered with another developer to develop API for HR management tool used by 3000 users in 8 countries.
- Started using Typescript
- Participated in the thinking/creation process of the API architecture
- Collaborated with cyber-security team to implement SSO (keycloak)
- Build a live webapp to let students pass exams remotely
- Build a back-office to let administrators and teachers create exams online
- UI integration (pixel perfect & responsive)

SIDE PROJECTS

MOULA MANAGER

ONGOING

STACK : VUE.JS / NESTJS / TYPESCRIPT

- Webapp based on NuxtJS to display crypto-currencies portfolio
- Type and register all your buyings to know your average buy price
- Visualize your wallets by connecting to major Web3 exchanges (Binance, Kraken, Coinbase)
- More to come... (gather all your personal finances into one single tool)
